ABOUT ISAPS

Founded in 1970, the International Society of Aesthetic Plastic Surgery (ISAPS) is the world's leading professional body for board-certified aesthetic plastic surgeons.

Regarded as the leading global authority on aesthetic and cosmetic surgery, ISAPS' threefold mission is to offer Aesthetic Education Worldwide®, to provide accurate information to the public, and to promote patient safety.

ISAPS membership includes the world's best and most respected reconstructive and aesthetic plastic surgeons in over 117 countries. Through its rigorous membership requirements, ISAPS plastic surgeons are considered to be among the most qualified surgeons in their respective countries. Furthermore, ISAPS has become the gold standard for providing continuing aesthetic education to its members, providing training, and sponsoring scientific meetings around the world.

A full list of ISAPS plastic surgeons can be found online at www.isaps.org.

ISAPS® International Society of Aesthetic Plastic Surgery

2025 ISAPS INTERNATIONAL SURVEY ON AESTHETIC/COSMETIC PROCEDURES PERFORMED IN 2024

Survey participants completed a questionnaire that focused primarily on the number of specific surgical and non-surgical procedures performed in 2024, along with a few ancillary questions related to surgeon demographics and the prevalence of medical tourism.

The International Society of Aesthetic Plastic Surgery (ISAPS) issued an invitation to participate in the study to approximately 17,000 plastic surgeons whose contact information is housed in its proprietary database. In addition, national societies were asked to encourage their members and constituents to take part in the survey. Data from 2,975 plastic surgeons were submitted or provided for the 2024 statistics. To increase accessibility and encourage broader participation, the survey was made available in four languages: English, Spanish, Chinese, and Japanese.

This year's study received an unusually high number of respondents than in previous years. The 2,975 participating surgeons represent a significant increase over the 1,600 respondents in 2023. Additionally, 32 locations are reported individually this year, compared with 23 in last year's report. The broader base of extrapolations for individual locations has influenced some worldwide procedure totals. Furthermore, several new procedures were added to this year's form, which may affect comparability with totals of prior years. When reporting percent changes from prior years, comparisons are limited to procedures that were consistent across years.

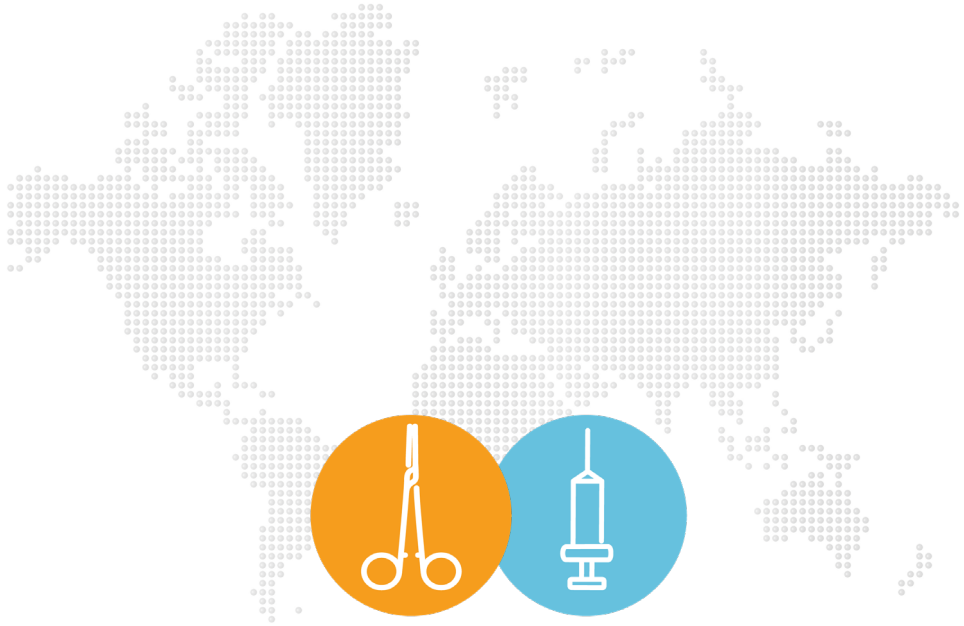

Final figures have been projected to reflect international statistics and are based exclusively on the estimated number of plastic surgeons actively practicing in each location and the respondent sample. This international survey focuses on physicians who are board-certified (or the national equivalent) plastic surgeons. New to this year, an effort was made to determine the proportion of plastic surgeons who primarily engage in aesthetic procedures rather than reconstructive work. This initial analysis found that approximately 80% of plastic surgeons worldwide focus on aesthetic procedures. In future years, we plan to expand this analysis and more closely examine the procedure volumes among aesthetic-focused surgeons.

The global estimated number of plastic surgeons counts for 98% of the estimated 58,500 plastic surgeons worldwide. In cases where a national society or National Secretary did not supply an updated figure, a simple regression model was used to estimate the number of plastic surgeons in that country based on its population size and Gross Domestic Product.

The Aesthetic Society, in collaboration with CosmetAssure, once again provided valuable support by permitting the use of its national dataset. This contribution includes detailed statistics from more than 700 US-based surgeons. We appreciate The Aesthetic Society's continued partnership in advancing this global research effort.

As with many studies of this type, outlying responses were addressed. While such values may be legitimate, they can distort averages that serve as the basis for projected estimates. To preserve the reliability of extrapolated results, significant outliers in this survey were adjusted accordingly. Additional standard data editing procedures were also followed to ensure responses aligned with survey guidelines. All reported values have been analyzed for statistical reliability.

Specific data are only shown for locations that provided a sufficient number of responses for the results to be considered statistically valid. Other than standard data editing procedures, no material adjustments were made to these figures.
The International Survey on Aesthetic/Cosmetic Procedures Performed in 2024 was compiled, tabulated, and analyzed by Industry Insights, Inc. (www.industryinsights.com), an independent research firm based in Columbus, OH, US. The survey was led by Scott Hackworth, a CPA and data scientist who—along with his firm—has conducted research on trends in aesthetic plastic surgery for more than 30 years.

HIGHLIGHTS

OF THE INTERNATIONAL SURVEY ON

AESTHETIC/COSMETIC PROCEDURES

PERFORMED IN 2024

2024 STATISTICS AT A GLANCE

Top 5 surgical procedures worldwide
